### PROFILE

A front-end developer with proven experience at Torch AI, Cerner, and SAIC in helping companies create a better experience with their brand, software, and maintain a better codebase. Capable of learning and adapting to technologies, and teams. Eager to tackle more problems and create using modern technologies as Next JS, React, HTML, and using APIs.

### EXPERIENCE

#### Front End Developer

Torch AI, October 2022 – Present

- Structed and developed the public facing website of Torch AI using Next JS, Contentful, and custom CSS animations.
- Helped designed the UI /UX of the website within Figma and coded the website based on company standards, wants and needs.
- Created custom react components.
- Used API to create automatic press release updates and career posts.

#### Production Software Engineer

Cerner, September 2020 – October 2021

- Work with clients daily, on call, providing server support and maintenance.
- Assist other team members and staff on problems, handling tickets, while under pressure and time constraints.

#### Application Developer

SAIC, March 2018 – July 2020

- Worked on 12 different web applications within the USDA, for the Conservation contract using Java, Spring, JavaScript, SQL, SVN, HTML5, and CSS3.
- Created documentation each application and provided daily O&M production support for clients, and application owners in real time dealing with issues for payments, data issues, and contract processing.
